Vulnerability Assessment Powered by Taegis VDR

Identify Risks and Vulnerabilities

The Challenge: Managing Risk

Unauthorized access to company resources using existing vulnerabilities is a serious security concern. Identifying, quantifying, and prioritizing security vulnerabilities in an environment can be a labor intensive, unmanageable process without the proper methodology, skills, automation, and tool sets. Illuminating these vulnerabilities, as well as providing the appropriate mitigation procedures, helps to not only reduce these risks but makes vulnerability management achievable.

The Solution

The Vulnerability Assessment powered by Secureworks® Taegis™ VDR is a point-in-time scan and expert-led assessment that helps to identity gaps in your network that attackers can exploit. Each assessment is based on a clearly defined customer-provided set of engagement rules to produce actionable results. Vulnerabilities and details are delivered via a rich, dynamic dashboard where you can tag assets, sort by severity, and assign items for remediation. Scanning can either take place from the Internet, against any Internet-exposed services, or from an Edge Services endpoint within an internal network (Cloud or on-prem) to scan against internal VLANs and networks.

CUSTOMER BENEFITS

- Validate your patching/hardening program
- Establish a security baseline
- Identify known, surface-level security issues and misconfigurations
- Save time with automated tasks
- Focus remediation with prioritized vulnerabilities

Vulnerability Assessment Engagement Methodology

Establish Rules of Engagement

Kickoff call and align on:

- Goals and objectives
- Scope and target validation
- Timelines
- Personnel roles and responsibilities

Taegis VDR Edge Services VM

- Configured and deployed (only needed for Internal scanning)

Execution of Vulnerability Assessment

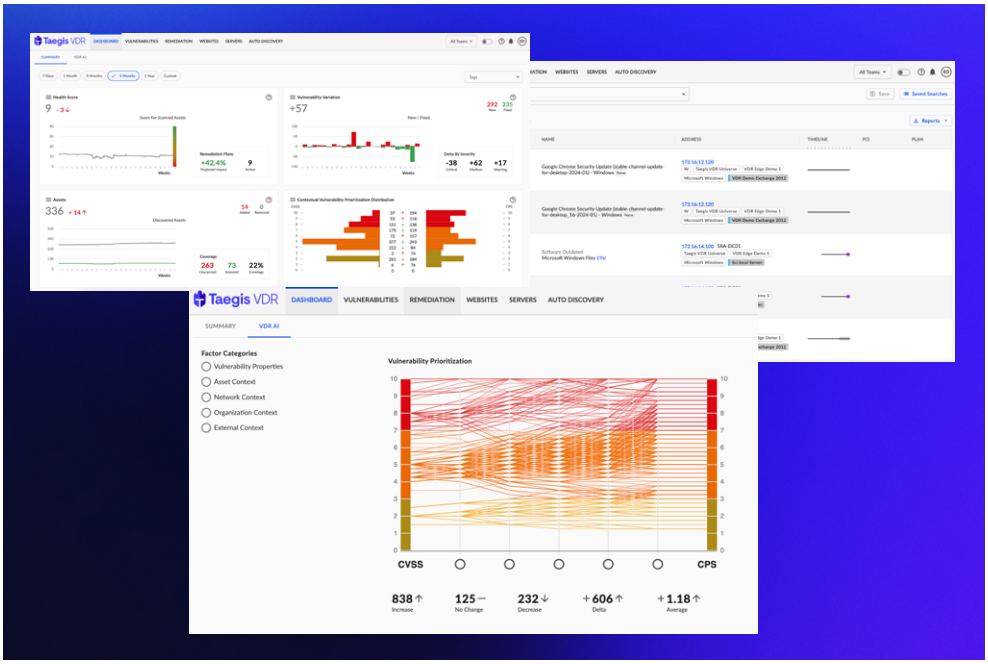
- Network discovery
- Scanning and vulnerability identification
- Creation of remediation plans

Results

- Results delivered via VDR Web Portal
- Review call with Secureworks Adversary Group

End of Engagement

At the end of the engagement, a member of the Secureworks Adversary Group will set up a call to review the results and run through suggested remediation plans and actions. Instead of a traditional report, you will be given access to the VDR Web Portal for 30 days, which allows for rich and dynamic consumption of your scan results, continued identification and prioritization of vulnerabilities, review of remediation plans, and other helpful features.



Continuous Vulnerability Management

For organizations seeking to put in place an ongoing vulnerability management program, Taegis VDR provides an approachable and accessible solution to ongoing vulnerability management. As your environment and assets change, we are continually monitoring for new vulnerabilities and prioritizing those in context of your company to prioritize and offer quick response actions.

Learn more about Taegis VDR

SERVICE FEATURES

Experienced consultant configures Secureworks Taegis VDR and runs discovery and scanning

Results delivered via dynamic Taegis VDR Portal with continued 30-day access

End of engagement walk through with Secureworks Adversarial Testing Expert

Prioritize all vulnerabilities based on risk scored by impact and likelihood of vulnerability being exploited

Secureworks®

Secureworks (NASDAQ: SCWX) is a global cybersecurity leader that secures human progress with Secureworks® Taegis™, a SaaS-based, open XDR platform built on 20+ years of real-world detection data, security operations expertise, and threat intelligence and research. Taegis is embedded in the security operations of over 4,000 organizations around the world who use its advanced, AI-driven capabilities to detect advanced threats, streamline and collaborate on investigations, and automate the right actions.
